Login at 'Manuscript Portal'

- ✓ Link: <http://www.gathacognition.com/manuscript-portal>
- ✓ Login details: Use your registered 'User ID' and 'Password' for login.
- ✓ Login details received with invite.
- ✓ Recover password using 'Forgot Password'.
- ✓ User guide is available at the link, Editorial Management from User Guide.

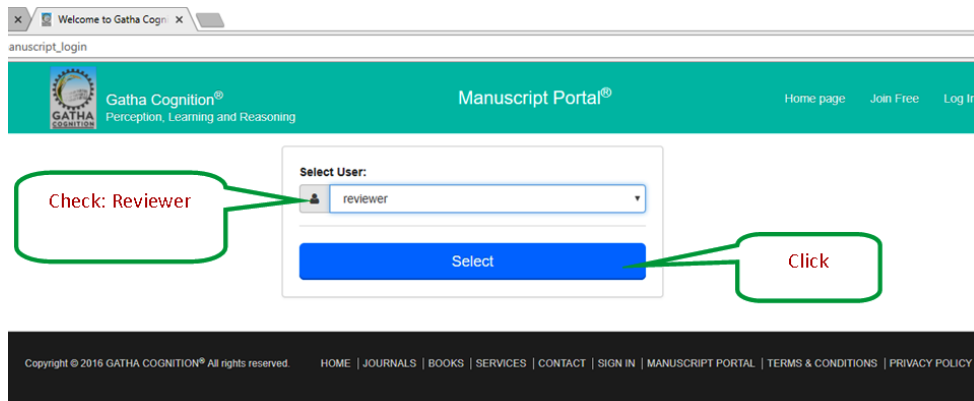

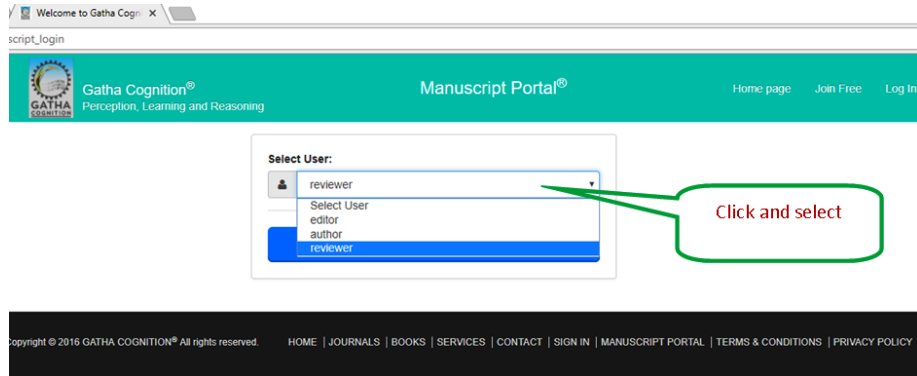

Registration of new user

The screenshot shows the registration form on the Manuscript Portal. The form is titled 'Sign up' and includes the following fields:

- Register As: Reviewer (dropdown menu)
- Salutation: Select salutation (dropdown menu)
- First Name: First Name (text input)
- Last Name: Last Name (text input)
- Affiliation: Affiliation (text input)
- Email: abc@gmail.com (text input)
- Alternate Email: Alternate Email (text input)
- Username: Username (text input)
- Password: Password (text input)
- Confirm Password: Confirm Password (text input)
- Country: Select Country (dropdown menu)
- Telephone: +91 122-122-3313 (text input)
- Fax: +91 122-122-3313 (text input)

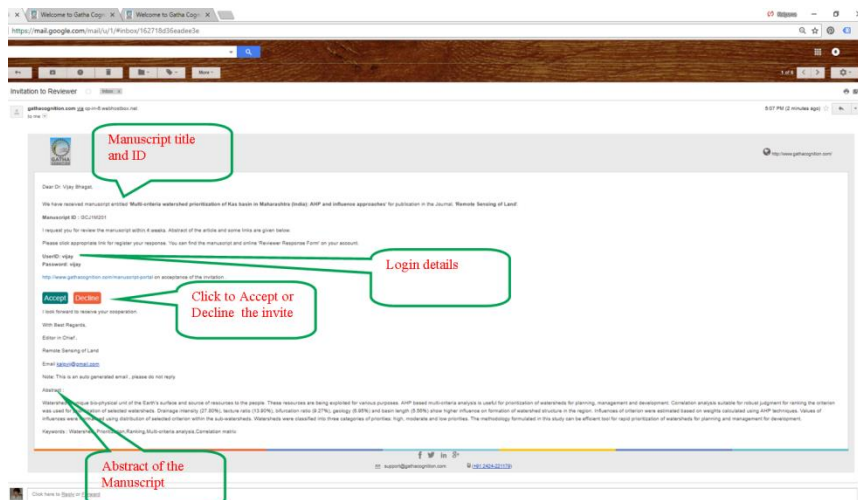

A blue button labeled 'Create My Account' is located at the bottom of the form.

- Select login option:
 - ✓ Click in the box.
 - ✓ Select the option 'Reviewer' from the dropdown.
 - ✓ Click on 'select'.

Call for Reviewer

- Invitation Email
 - ✓ Click on the 'Accept' tab in the invitation email.
 - ✓ 'Manuscript Portal' will be opened.
 - ✓ Use the login details given with the invite.

- Accept Manuscript for review
 - ✓ New manuscript(s) appear in the tab 'Call for Reviewer'.
 - ✓ Click on 'Accept' to accept the manuscript for review.
 - ✓ The Editor in Chief should accept the manuscript and assign the Editor from the Editorial Board for expert assessment if required instead of declining.

Manuscript Details

Name of Journal	Remote Sensing of Land
Full Title	Multi-criteria watershed prioritization of Kas basin in Maharashtra (India): AHP and influence approaches
Article Type	Original Research Paper
Date of Submission	29/03/2018
Highlights	• AHP based multi-criteria analysis is useful for prioritization of watersheds. • Morphometric parameters, soil and geology were used for prioritization of watersheds. • Correlation analysis is useful for robust judgment for ranking the criterion. • Estimated influences were normalised using distribution of selected criterion. • Watersheds were classified into three categories of priorities: high, moderate and low priorities.
Key Words	Watershed ,Prioritization,Ranking,Multi-criteria analysis,Correlation matrix
Abstract	Watershed is unique bio-physical unit of the Earth's surface and source of resources to the people. These resources are being exploited for various purposes. AHP based multi-criteria analysis is useful for prioritization of watersheds for planning, management and development. Correlation analysis suitable for robust judgment for ranking the criterion was used for prioritization of selected watersheds. Drainage intensity (37.80%), texture ratio (13.80%)
